SUMMARY

As an experienced software tester, I excel in manual testing and using various methodologies for top-notch quality. My goal is to enhance testing processes and deliver high-quality products. I'm a collaborative team player, always eager to learn and stay updated with the latest trends. My strengths include analytical and communication skills, and I thrive in fast-paced environments. I'm seeking an opportunity to join a professional team where I can make a real difference in ensuring successful product delivery to the market.

SKILLS

Hard skills

Jira TestRail Postman Manual QA Black testing Web/Desktop/Mobile testing Performance Regression Sanity Waterfall Test design techniques SDLC SQL (MySQL, SQLite) Git/Github HTML/CSS XML JSON Security testing

Soft skills

Flexibility Communication Adaptation Teamwork Problem solving Time management

EXPERIENCE

Software Tester, Sep 2022 – Present

Project: Joyn.de
- Creating permission table and Requirements Traceability Matrix
- Developing test cases using test design techniques
- Developing Decomposition
- Executing test cases in TestRail
- Reporting bugs into Jira
- Taking part in Sprint Planning meeting, Daily Scrum meetings, Sprint Retrospective
- Creating test report

Project: Mova [Mobile testing]
- Developing and executing Test Cases
- Testing with Android Studio, Genymotion
- Reporting bugs into JIRA

Project: IMDb [Mobile testing]
- Developing and executing Test Cases
- Testing with Android Studio, Genymotion
- Reporting bugs into JIRA
